

## Bahamas Reef Environment Educational Foundation Invites You to View

BREEF's Video uploads on YouTube

This short film takes a look at the experiences of teachers at our 2007 Marine Conservation Teacher Training Workshop. <http://www.youtube.com/watch?v=Fyf-bAybRfE>

A collection of short skits made by teachers at the 2007 BREEF workshop which highlight the importance of Mangrove creeks. [http://www.youtube.com/watch?v=s9SRx1X6N\\_o](http://www.youtube.com/watch?v=s9SRx1X6N_o)

This song written, and sung by teachers at this summer's workshop, will help students and interested members of the public learn about the four species of mangroves found in The Bahamas. [http://www.youtube.com/watch?v=bDJTDkFE\\_Fc](http://www.youtube.com/watch?v=bDJTDkFE_Fc)

A truly entertaining skit produced by Bahamian students for the National Coastal Awareness Science Competition. These brilliant students from the NGM Major High School, Long Island, Bahamas, were led by their teacher who participated in the BREEF workshop in 1998 and has been doing great work with her students ever since. The skit highlights the status of the Nassau grouper and the importance of the closed season to its management and conservation.
